

## The Secret Cave

The secret cave is very secret. Only my family know where it is and have been there. Now Callan's older, he can go in the cave. It is just mum, dad, my brothers Will, Callan and me that are allowed in it. You would need to know it was there, or you would miss it. I discovered the cave one day, we were climbing to find some crabs, and found the cave. It was raining that day. It is the best type of day to find crabs. The rain turned into hail, so we ran into the cave to shelter. We had never seen the cave before, I was sure we had not seen it before. We go down to the Mill Geo lots, so it was strange to just appear.

Me and Will called the cave Da Jamieson cave. We do not tell people about our cave. To get to the cave you have to go to over the fence to Deborah's, passed our vegetable patch, down the hill to the banks, then up a small hill, over another fence and then finally to the Mill goe. Then go over the burn and then go straight and then go across to the lump of grass at the Mill Geo.

The entrance of the cave is made of sea glass, with sea anemones for guards. All different colours of sea glass, clear, green, brown, orange, dark and light blue. There is not a door, but I think in winter we should make a door. Inside the cave it is made of stone and rocks. All the stones are flat, ready for us to paint them. There's a grass path. A rabbit lives there with her two baby rabbits. They eat the grass, and tunnel to go in and out.

We put all the stuff we find at the beach in the cave. My shell collection, sea glass and old pottery. Crab's that are in a cage. Anytime, I want a crab to scuttle over my hand I go to the cage and get a crab. They are very tame, and like to scuttle, they never nip me.

There is a picnic set up all the time in the cave. It never rots and there is plenty of food in the picnic basket. You have to just say a food and it appears in your hands. There is a tap and you can say any drink and it comes out. You can drink out of the glasses that are there. The glasses are green and have shells all over them. The knife is a swordfish, its OK till I need butter on my flaky biscuits. There are singing cupcakes that are the size of dad. That's 6-foot high.

We don't need to clean up the dirty dishes from the picnic. There is a catfish in a sink that sucks up all the leftovers on the plates and glasses. The catfish likes to clean the whole cave. He will eat anything.

The flowers are blue in the middle and yellow on the outside. They are magical and look good. You say, 'please can I have a sweetie', and it sprouts out a sweetie. I love that flowers. Right inside the cave is a tree with Rosie red flower's, with a nest and eggs at the top.

There is a room in the cave, that is a circus room. It has an octopus that can juggle 8 scabby man's heads at one time. A singing fish that dances as well. A strong whale that is tiny, so it can fit in the room. If you want to join in the circus you can. Its free to go into the circus.

On the roof of the cave is glowing star fishes all through the cave. That lights up the way, just like lightbulbs. At the end of the cave there is a wishing well and you wish for anything you want. The wish only lasts for one whole day. My last wish was that Bobby was still alive. I introduced him to Callan. He made Callan laugh by showing him his false teeth. Me and Will laughed too, just like the way he used to make us laugh. I gave Bobby a pandrop from the magical picnic table. The wishes only last a day.

The cave is a secret place, so please do not tell anyone. If you do, you might get a visit from the strong tiny whale.
